Introducing...

**KammEdge.** NEW

 **Rhino**

# KammEdge.

## **Aerodynamic Nose Cone**

Streamlined, low-drag nose cone allows air to flow smoothly over the rack, reducing wind noise and improving fuel efficiency.

## **Low-Profile Rack Design**

Sits lower than traditional roof racks, reducing overall vehicle height and weight while maintaining load-carrying strength.

## **Lightweight Yet Strong**

15% lighter than KammRack, with Rhino's renowned strength for ladders, boards, sheeting, and bulky loads.

## **Fast, One-Person Installation**

Designed for extremely quick fitment, with most racks installable by a single fitter, minimising vehicle downtime.

## **Full-Width Aluminium Rear Roller**

Robust anodised aluminium rear roller simplifies loading and unloading of ladders and long materials.

## **Click-Together Side Frames**

Side frames are supplied in two sections for easy handling and quickly click together for fast assembly.

## **Premium Finish Options**

Available in silver anodised aluminium or black powder-coated finish to suit fleet branding or your personal preference.

A low-profile design adding just 18 cm to your van

Full-width aluminium rear roller

Aerodynamic nose cone and bars to reduce wind noise

Strap & Eyelet kit available to secure materials to your van
