KammRoller™

The KammRoller is now more durable and easier to install than ever. Our design team has successfully reduced its weight without compromising on its strength. Design enhancement includes a transition to boxed profile side arms, increasing rigidity and minimising flex. Its lightweight aluminum construction integrates perfectly with both the KammBar Pro and KammBar Fleet, as well as with modern commercial vehicles. The KammRoller features black powder-coated side arms, paired with a sleek silver roller.
